

Salmon Cat Treats

Ingredients

220gm, approx, of canned salmon, undrained

1 egg beaten

250gms of wholemeal flour

How to make

- Pre-heat the oven to 350F, 175C or gas mark 4, and line a baking tray with greaseproof paper.
- Mash together, finely, your canned, undrained salmon or use a food processor.
- Add the egg and flour and mix together to form a tacky dough. Add a little more water if too dry or add a bit more flour if too wet.
- Next, take your dough and roll it out, to about ¼ inch thick, onto a floured surface.
- Cut out your shapes with a biscuit cutter and have fun. Try to make them all a similar size so they all cook evenly. Place them on your lined baking tray.
- Bake for 20 minutes or until they're slightly browned and crunchy. Make sure to cool completely before serving!

Please note - Should your cat have any underlying health problems please check with your vet that the ingredients are suitable for your cat to eat before feeding. Don't feed them too much as it's a treat!
